FUNDING

PROJECT

REPI Challenge

Cultivate projects that conserve land at a greater scale and test promising ways to finance land protection.

Achieve benefits not obtainable by typical REPI projects in order to protect critically important military missions.

Harness the creativity of the private sector to access and leverage unconventional sources of funding and market-based approaches.

Purpose Statement

Build an understanding of federal agency coastal resilience needs, find common ground and leverage expertise, human capital, and financial assets across local, tribal, state, private, and federal stakeholders to establish a repeatable [governance] model that achieves shared goals.

Awareness, Alignment, Strategy, Investment, Model

Goal 4 CRMP: Coordinate all state, federal, regional, and local coastal adaptation & protection efforts in accordance with the guiding principles of this Framework

Lines of Effort

Action

- Recommend state governance role
- Deliver a prioritized list of existing shared projects
- Target a recommended project
- Develop a model that delivers collective local, tribal, state, private, and federal strategy and investment to execute a recommended project
- Work cooperatively with DoD installations and their surrounding communities to secure OLDCC grants to conduct Compatibility Use Plans or addendums that address climate resiliency.
- Pursue appropriations for CRSM studies for the area of Virginia included in the Coastal Resiliency Master Plan.
- Support legislative language that enables USACE to include federal property in non-DoD funded feasibility studies
